CSE427:VIRTUALIZATION AND CLOUD COMPUTING LABORATORY

L:0 T:0 P:2 Credits:1

Course Outcomes: Through this course students should be able to

CO1 :: recognize the need of virtualization for efficient utilization of computer resources

CO2 :: analyze the technical process of creating virtual machines, clones and snapshots to know about their usability

CO3 :: define various key technologies and capabilities required for the implementation of virtualization and cloud computing infrastructure

CO4:: enumerate the applications of cloud computing technology based on its various models

CO5 :: articulate the technicality of VM exploitation to get more insights about the Vcenter server

CO6 :: examine the usability of cloud based tool to understand the applications of cloud computing

List of Practicals / Experiments:

Container technology

- installation
- · Working with containers
- Configuring containers

Understanding virtualization

- · Virtualization and Cloud Computing
- Virtualizing servers
- · Virtualizing desktops
- Virtualizing applications
- BIOS setting of Physical machine for virtualization technology

Understanding hypervisors

- Exploring the hypervisors
- Understanding type 1 hypervisor
- Understanding type 2 hypervisor
- Resource allocation

Understanding virtual machines

- Examining CPU's in a virtual machine
- Examining memory in a virtual machine
- Examining network resources in a virtual machine
- Examining storage in a virtual machine
- Understanding how a virtual machine works
- Understanding virtual machine clones
- Understanding templates
- Understanding snapshots
- Understanding OVF

Creating a virtual machine

VM configuration

Session 2023-24

Page:1/3

- Full and Linked Clone in VMware Workstation
- Exploring VMware Workstation
- Installation of VMware Workstation

Installing a guest OS

- · Installing windows on a virtual machine
- · Loading windows into a virtual machine
- Installing vmware tools
- Understanding configuration options
- Optimizing a new virtual machine
- Installing linux on a virtual machine

Protecting virtual machine

- · Cloning a virtual machine
- · Saving a virtual machine state
- Creating a snapshot

Management With vCenter Server

- vCenter 6 Overview
- Creating a Virtual Machine in HOL
- · Cloning VMs and using Templates
- · Tagging and Search to find objects quickly
- Monitoring events and creating alarms
- Migrating VMs with VMware vMotion
- vSphere Monitoring and Performance

Introduction to vSphere Network and Security

Understanding Single Sign On

Simulation using cloudsim

- Installation of cloudsim
- Setup of cloudsim
- Working with Cloudsim core package
- Understanding Entity Classes
- Simulate a cloud scenario using CloudSim and run a scheduling algorithm

Text Books:

1. CLOUD COMPUTING: FUNDAMENTALS, INDUSTRY APPROACH AND TRENDS by RISHABH

SHARMA, Wiley India

References: 1. MASTERING CLOUD COMPUTING by RAJKUMAR BUYYA, CHRISTIAN VECCHIOLA

,S.THAMARAI SELVI, MCGRAW HILL EDUCATION
